The Executive Principal Word - Al Khoud Branch

As we approach the end of this academic year, I extend to you my sincerest congratulations and appreciation for the tremendous efforts you have exerted during this period of study. It has been a year filled with achievements and challenges, and together we have managed to overcome all difficulties and reach the endpoint with pride and honour.

Throughout this year, we have achieved numerous milestones, thanks to our collective cooperation and dedicated efforts.

Among these achievements:

Ms Amal Al Abri
Executive Principal

1 Moving to the new school building

Undoubtedly, this step was one of the most significant achievements we accomplished this year. Through joint efforts, we were able to provide a suitable educational environment equipped with the latest technologies, which will greatly enhance the quality of education and provide a more interactive and stimulating environment for our dear students.

2 "21 Days of Excellence" Meditation Initiative:

This initiative, launched by Her Excellency Engineer Azza Al Ismaili, the founder and CEO of United Schools, significantly contributed to enhancing our students' meditation and relaxation skills, positively impacting their academic performance and positive engagement in classrooms.

3 Outstanding Results in International Examinations:

This year witnessed outstanding results in international examinations, with some of our students achieving remarkable success at a global level. We are proud of Ibrahim Omar, who ranked first globally in Mathematics in the IGCSE exams, as well as being the top scorer in all subjects in the country. We also congratulate Ilaaf Al Dafai, who achieved the first place in the country in Arabic Language in the A Level exams.

4 General Education Diploma Results:

Our school takes pride in its continuous achievements in the General Education Diploma results over the past ten years, with outstanding and promising outcomes. During this academic year, our students achieved high success rates, with approximately 32% of our students scoring between 99-90%. This achievement reflects the tremendous efforts made by students and teachers throughout the academic year.

In addition to these achievements, we place great importance on the quality of education and academic excellence for our students. Therefore, we provide careful monitoring to track students' progress and systematically analyse their results, aiming to provide individualized therapeutic and motivational plans that meet the needs of each student.

Throughout this academic year, we witnessed our students' dedication to their studies, creativity in extracurricular activities, and spirit of cooperation among them. We also witnessed the unlimited support from parents, which played a significant role in achieving these successes. I would like to congratulate all students on successfully completing this year and encourage them to continue striving for knowledge and excellence. To our twelfth-grade students, we wish you every success in your future endeavours, confident that you will be distinguished ambassadors for our school. I would also like to thank all members of the teaching and administrative staff for their diligent efforts and dedicated work. Once again, they have proven that education is not just a job, but a noble mission aimed at building an enlightened and educated generation. In the coming year, we aim to implement several sustainable school projects that will contribute to the development of our educational environment and enhance environmental awareness among our students. We will organize the first Youth Sustainability Forum on the occasion of Omani Youth Day, which falls on October 26th of each year. Details of the project and the targeted categories will be announced in mid-August. We hope this forum will be an opportunity for our students to engage with sustainability issues and contribute to building a better future. In conclusion, I wish you all a happy and safe summer vacation. We look forward to welcoming you in the next academic year with enthusiasm and optimism to continue our educational journey together.

THE FIRST 21 DAYS PROGRAMME

As the academic year comes to a close, we are thrilled to share the tremendous success of the "First 21 Days" programme. This initiative, aimed at instilling the right study habits, daily routines, and core values in our students, has made a significant impact across all year groups, fostering a more engaged, disciplined, and motivated student body.

Our Intent: To equip UPS students with the essential tools, habits, and mindset needed for a successful academic year.

The programme was structured in phases to help students adapt smoothly to their new environments. To facilitate this, we broke the programme into 3 discreet phases:

Days 1-7: Foundation Phase

- **Introduction to the Initiative:** Students were introduced to the programme, its goals, and expected outcomes, setting a clear path for their academic journey.
- **Daily Routine Establishment:** Each day began with mindfulness or meditation exercises to centre students, followed by journaling, setting daily goals, and reflection. This routine helped students start their days focused and prepared.
- **Introduction to UPS Values and Hygiene Practices:** Students were introduced to our school's core values and the importance of hygiene. Initial sessions focused on the significance of these principles in their daily lives.

Days 8-14: Development Phase

- **Study Habit Workshops:** Students were introduced to effective study strategies such as the Pomodoro technique, effective note-taking, and active recall. Emphasis was placed on the importance of regular breaks and proper sleep, fostering healthy study habits.
- **Physical Health:** We stressed the importance of regular exercise, proper nutrition, and hydration. Short, daily physical activities were introduced to keep students active and healthy.
- **Emotional Well-being:** Resources and guidance on managing stress, building resilience, and understanding emotions were provided to support students' emotional health.

Days 15-21: Reinforcement Phase

- **Peer-led Sessions:** The peer-led sessions on study habits, daily routines, and hygiene practices fostered a supportive and collaborative learning atmosphere. Students greatly benefited from the insights and experiences shared by their peers.
- **Personal Reflections and Planning:** Students engaged in meaningful personal reflection exercises and developed detailed plans for their academic year. This strategic approach empowered them to set and achieve their goals.
- **Celebration and Recognition:** Recognising students who exemplified our school values and maintained excellent hygiene standards proved to be a powerful motivator. The celebrations not only honoured individual achievements but also inspired others to strive for excellence.

Impact and Success

The "First 21 Days" programme significantly enhanced student engagement and performance across all year groups. Students demonstrated improved study habits, better time management, and a more positive approach to their academic and personal responsibilities. The emphasis on emotional well-being and physical health has also contributed to a more balanced and healthy student community. The introduction and reinforcement of our core values cultivated a stronger sense of community and respect among students.

The positive habits and mindsets developed during this programme set a strong foundation for academic success. The feedback from both students and teachers was overwhelmingly positive, highlighting the programme's role in creating a more structured and supportive learning dynamic.

Grant Best
Head of primary

Welcoming the New Academic Year 2023/2024

EVENTS

With the beginning of each academic year, the anticipation to reunite with our students renews. In celebration of this reunion, the school demonstrates its readiness and preparations to welcome its students by organizing a reception ceremony. This ceremony includes welcoming the students, introducing them to the school facilities, conducting orientation programs to familiarize them with the school's behaviour expectations, implementing some recreational activities, and distributing gifts to the students.

This reception is an essential part of the educational process, as it provides an ideal opportunity to build a positive relationship with the school environment, break the barrier of fear of returning to school, and enhance the students' sense of happiness upon their return.

EVENTS

OMANI YOUTH DAY

With the energy and enthusiasm of youth, nations are built. They are the vibrant present and the promising future. In line with the vision of our schools to shape capable and influential leaders in Omani society, and as an expression of our pride in the creative student leadership, the Activities Department organized an open day event called "Youth Lounge."

The event included a forum for scientific and skill-building workshops, with the participation of several external community institutions that played a significant role in the success of the day. These included the Scientific College of Design, the Higher Institute for Health Specializations, Sensor Electronics Foundation, the Flower Arrangement Store, and the Environmental Authority.

Students expressed their deep gratitude and appreciation for the valuable knowledge and practical skills they gained through their engagement in this enriching event. By empowering the youth, we invest in the future of our nation.

World Children's Day

Today's Children are tomorrow's leaders

Under the slogan 'For Every Child, Every Right,' the school celebrated World Children's Day, which falls on November 20th of each year. The celebration involved the allocation of a previously announced award for teachers and their students to compete in commemorating this day by presenting various creative contributions and segments, as well as decorating classrooms with blue colour as an expression of the rights of childhood – psychological, scientific, and physical.

On this day, a special message of solidarity and love was dedicated from the children of Oman to the brave children of Gaza, reaffirming our commitment to protecting the rights and well-being of all children.

Omani Tree Day

Oman celebrates Tree Day on October 13th of each year. Kindergarten students participated in activating this occasion through various activities, including planting seedlings, coloring and decorating plant pots, as well as engaging in different drawing and coloring activities. Our children expressed their gratitude for trees, which are a source of purity, food, and belonging.

Celebrating Tree Day provides a great opportunity to encourage future generations to plant trees, raise awareness about their importance, and preserve them for the betterment of our environment.

World's Mental Health Day

In conjunction with World Mental Health Day, the Activities Department organized a health event aimed at raising awareness about the importance of mental health and educating about the methods and approaches through which it can be maintained. It also shed light on ways to achieve the best possible level of psychological adaptation and self-efficacy.

The event included two initiatives: the 'Happiness When Shared' initiative, which delivered messages of gratitude and positive reinforcement to the school staff, including teachers, students, security guards, and janitors, emphasizing their significant role in achieving a comprehensive mental health system within the school community. The second initiative, titled 'Shine as if the whole universe is yours,' was dedicated to teachers – the heroes in each student's story. This initiative took the form of a breakfast for teachers, motivating them to start their school day with a special morning boost.

Solidarity Stand and Charity Market

In embodiment of the values of unity, generosity, and compassion, the school organized a solidarity stand in support of the resilience of the Palestinian people. The stand included student participation in raising slogans expressing the rights of the Palestinian people, writing supportive messages for Palestinian children, along with chanting prayers for God to grant victory to their brethren in Gaza and to bestow upon its people triumph, dignity, and dominance. Alongside this stand, a charity market was organized, participated in by the school students and their honourable parents, with the proceeds designated for donation to our brothers in Gaza. This stand came with a message of hope and shared humanity, reminding our students of the strength we possess to make a positive impact whenever we can, and assigning them a collective responsibility to lend a helping hand, each according to their ability.

The Nobel Birth of the Prophet's

In commemoration of the Muhammadan message and in belief in the importance of instilling the biography of the beloved of the Merciful in the hearts of students, the school launched a competition titled 'Lovers of the Messenger of Allah' coinciding with the anniversary of the Noble Birth of Prophet Muhammad. The aim of the competition was to provide students with the opportunity to express their love and emulation of the life of the best of creation, each according to their inclinations and skills, whether through drawing, writing stories, composing poetry, or through the skills of public speaking and oratory. On the other hand, teachers excelled in commemorating this occasion by presenting lectures and various workshops.

The Night Journey and Ascension

The school was illuminated by the fragrances of the Night Journey and Ascension, as it commemorated this blessed occasion through a special radio program. It began with the recitation of verses from Surah Al-Isra, followed by a speech about the lessons learned from this commemoration and how to apply them in our contemporary reality. The program also included the recitation of poems and musical compositions. Additionally, the school's learning resource room participated in celebrating this occasion by presenting a film summarizing the story of the Night Journey and Ascension.

Omani Teacher's Day

In appreciation and recognition of their dedicated efforts and educational mission, the school celebrates Omani Teacher's Day, which falls on the 24th of February every year. The school administration organized an open day of entertainment for the teachers, which included various entertainment competitions and sports games in an atmosphere filled with affection and joy. Additionally, members of the administrative and teaching staff were honored, and the day concluded with a lunch invitation for the teachers.

This celebration serves as an opportunity to express deep gratitude to the school's teachers for their continuous efforts in developing students and preparing them for a better future.

EVENTS

Honoring the Top Students

Under the patronage of Dr. Khadija bint Abdullah Al Salamiyah, the General Director of the General Directorate of Private Schools, the school celebrated the honoring of a select group of its outstanding students who achieved remarkable results during the first semester of the academic year 2023-2024.

This annual ceremony, organized by the school, serves as a token of appreciation for the diligent students and as a step towards encouraging performance. The ceremony included a welcoming display, along with several segments aimed at encouraging students to persist and excel. The honourees delivered speeches expressing gratitude to the teachers and parents for their support in achieving this level, emphasizing that determination and perseverance are the pathways to reaching the highest levels. At the conclusion of the ceremony, the patron of the event presented the outstanding students with certificates of excellence.

Graduates' Evening

'We Were Delighted to Meet You' was the theme of the second gathering for graduates of United Schools. The organization of this event stems from the school's commitment to reconnect graduates with each other, exchange experiences, and share paths of professional and personal life. It served as an opportunity to review the graduates' career and personal life trajectories, and to share the successes and challenges they faced. The event included a welcoming address from the school administration, a program presented by the seventh batch of graduates, and concluded with networking sessions and an exchange of experiences among the graduates, followed by a dinner.

Cultural Day

Under the theme 'Let's Get Acquainted,' the Cultural Day was organized with wide participation from students and teachers. It was a remarkable and inspiring event through its diverse activities and programs. Students had the opportunity to explore and understand multiple cultures in an enjoyable and interactive manner. They were also able to learn about traditions, customs, and cultural backgrounds through presentations and traditional arts, as well as enjoy displays of popular foods from various cultures. This event encouraged the exchange of experiences and knowledge among students and fostered pride in the cultural identity of each country.

World Cancer Day

With a unique initiative from the tenth and eleventh-grade students, an event was held to commemorate World Cancer Day, which falls on February 2nd every year. The event included a charity market where proceeds were dedicated to supporting cancer patients. Additionally, there were various artistic workshops and competitions organized in collaboration with a group of teachers.

Leadership Development and Skills Enhancement

Unlocking Potential with the SOI Discover Learning Programme

At United Private Schools, our commitment to fostering educational excellence is embodied by the SOI Discover Learning Programme. Recently introduced, this extracurricular initiative is designed to enhance cognitive abilities and deepen understanding through tailored support, innovative teaching strategies, and engaging activities. The first three phases of the programme have already delivered noticeable changes in student engagement, and learning approaches are beginning to evolve. These early indications are promising and reflect the programme's potential to positively impact academic performance. The SOI Discover Learning Programme is available after school hours and is tailored for those who seek to further their academic prowess. Although it is not a compulsory part of our curriculum, it serves as a robust supplement that supports our broader mission to nurture scholastic excellence in a select group of motivated students. We are optimistic about the future of this programme and its role in helping participating students reach new heights in their educational journey.

Competition: Poetry Recitation for Young Children

Believing in the importance of discovering students' talents and refining them under the slogan "With eloquent speech, the tongue resonates," the Arabic Language Department organized a poetry recitation competition for young children aged 6 to 9.

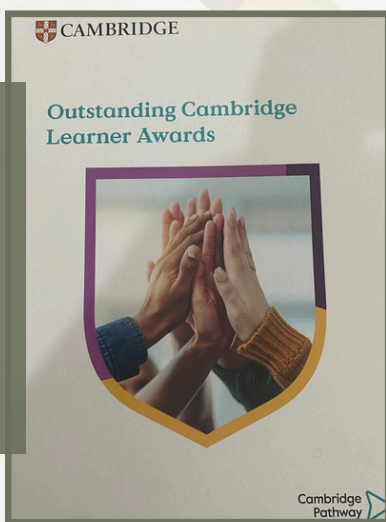

During this competition, our young students were able to memorize poems from both ancient and modern Omani poetry, celebrating their homeland, knowledge, teachers, love, peace, and commemorating the resilience of Palestinian children with impactful words.

These competitions provide a wonderful opportunity to instill a passion for poetry and literature, creating a generation that appreciates the beauty of the Arabic language and is familiar with its literary traditions. It aims to cultivate a generation capable of expressing their opinions and positions with confidence, eloquence, and clarity.

Global Recognition | Outstanding Cambridge Learner Awards

We are delighted to share the exciting news that some of our students have been awarded the prestigious Cambridge Outstanding Learner Awards. These awards recognise exceptional academic achievements on a global scale, celebrating students who have achieved the highest marks in their subjects. It is a remarkable and rare accomplishment, reflecting the dedication and excellence of our students, and bringing significant international recognition to our school community.

Graduation Ceremonies

Graduation Ceremonies: Joy of Success, Excellence in Organization, Mastery in Performance

In an atmosphere filled with joy, happiness, pride, and celebration, United Schools organized graduation ceremonies for the academic year 2023–2024.

- The Graduation Ceremony of the Tenth Batch of the Education Diploma, under the gracious patronage of His Excellency Dr. Kamil bin Fahd Al Said.
- Kindergarten Graduation Ceremony, under the sponsorship of Her Excellency Engineer Azza Al Ismailia, the Founder and CEO of United Schools.

The ceremonies were attended by distinguished parents, faculty, and administrative staff, and they marked the culmination of a year of dedication and commitment towards achieving honourable results and enhancing the educational process. The programs of the ceremonies were diverse, blending emotions with hopes and challenges. Through their speeches, our graduates expressed their boundless hopes, extending gratitude to their teachers, parents, and not forgetting the invaluable role of United Schools, which they affirmed would remain a beacon of knowledge and excellence in their hearts and minds. Our young children advocated for children's rights in a subtle message directed towards humanity, expressing solidarity with all the children of the world, especially those

deprived of their childhood. The graduates' voices resonated with heartfelt words expressing deep belonging to their homeland, Oman, in a special segment where they were joined by the talented poet Hisham Al Saqri. Gaza was present with its resilience and pride, as the students' voices harmonized with the creativity of the distinguished poet Hisham Al Saqri and the melodies of the talented singer Mohammed Al Wahibi. Everyone praised the excellence of the students' performances, their sincerity, and their distinctive presence, affirming that the noblest goal of United Schools is to develop the students' personalities and equip them with the skills to be active members of their society and nation.

SPORT ACTIVITIES

Sports: Ethics and Communication

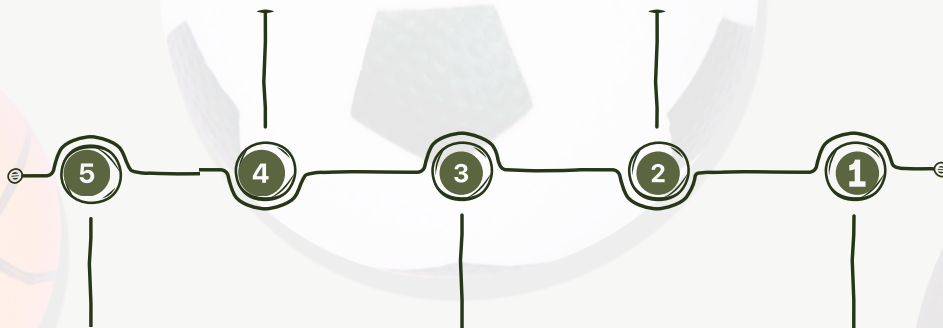

School sports play a vital role in the holistic development of students from multiple aspects. It's not just physical activity; it's a comprehensive educational tool. Firstly, sports contribute to improving students' physical health by enhancing fitness, strengthening muscles and bones, and increasing body flexibility. Secondly, sports serve as an effective means to relieve stress and mental pressure, positively impacting mental health and promoting feelings of happiness and comfort. Socially, sports help in fostering team spirit and cooperation among students, as they learn the importance of teamwork and collaboration to

achieve common goals. Additionally, sports promote ethical values such as discipline, respect, and responsibility, as students adhere to the rules of the game and learn to respect their opponents. On the other hand, sports enhance academic performance, as studies have shown that physical activity helps improve concentration and attentiveness in classrooms. Furthermore, sports boost self-confidence and self-esteem, as students feel a sense of accomplishment and excellence when achieving sports-related goals. In conclusion, school sports are an integral part of comprehensive education, contributing to the balanced and integrated development of students physically, mentally, socially, and academically, preparing them to be productive and creative individuals in society.

Results Achieved in the School Sports Section for the Year 2023–2024:

Extracurricular activity
(swimming)

Third place overall among
private schools in Muscat
Governorate in girls' athletics

Scouting activity

Intra-school activities included
competitions throughout the year
(chess competition, fitness challenge)

Second place overall among
private schools in Muscat
Governorate in boys' athletics

Mr Ghassan Zuhair

PE Teacher

ACTIVITIES DEPARTMENT

School Excursions: Educational Experiences Beyond the Classroom

School excursions are considered an essential part of the learning experience. They are more than just recreational activities; they are educational experiences that provide students with the opportunity to discover new worlds outside the classroom. These excursions offer practical learning opportunities and broaden students' cultural horizons, contributing to their personal development and motivating them to explore more knowledge.

The main objectives of organizing these excursions include:

1. Stimulating curiosity, exploration, and experiencing new things in an interactive and direct manner.
2. Developing social skills, enhancing effective social communication among students, and fostering positive relationships among them.
3. Expanding cultural horizons and learning beyond textbooks in ways that enrich their personalities and broaden their intellectual horizons.
4. Developing leadership and organizational skills by assigning leadership roles to students, which enhances their communication, organizational, and decision-making skills.

Every year, the school, represented by the Activities Department, adopts a comprehensive and organized plan to arrange and manage educational and recreational excursions. This plan enriches the curriculum on one hand and rejuvenates activity and vitality on the other. It's worth mentioning that these excursions are conducted according to standards and guidelines approved by the Educational Activities Department of the General Directorate of Education in Muscat Governorate.

ACTIVITIES DEPARTMENT

Building the Future through Volunteering:

The Impact of Volunteer Activities on Harnessing Student Energy and Enhancing Community Contribution

Students, with their young skills and energies, are a key driving force for change and improvement in societies. Through participating in volunteer activities, students can develop themselves personally and socially as they provide valuable services to their community and beloved country, Oman. Believing in the profound impact of volunteering on the personal and social development of students, as well as its role in fostering social engagement, the Activities Department organizes a variety of volunteer

initiatives throughout the academic year. Each volunteer activity is assigned to a specific academic stage, allowing for the participation of the largest number of students possible. Here are some of the prominent volunteer activities organized by the 'Humanitarian Team', the school's volunteer team, this year:

Goodness Piggy Bank Project

in collaboration with the Omani Charitable Organization

Ramadan Basket Project

in collaboration with the Mercy Association for Maternal and Childcare

School Bag Project

in collaboration with the Mercy Association for Maternal and Childcare.

Charity Market Project

to Support Cancer Patients in collaboration with the Omani Cancer Association.

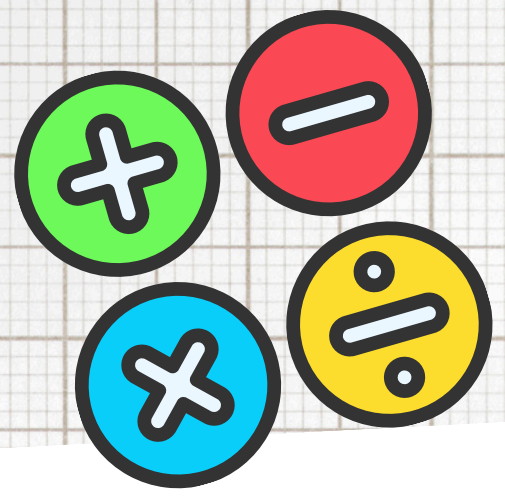

Solidarity Charity Day Project

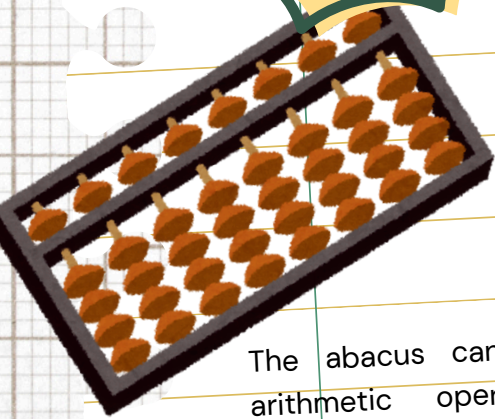

to Support Gaza in collaboration with the Omani Charitable Organization.

The Math Genius

Math Genius Program: Unlocking Brain Potential through Abacus Education

The Math Genius program is designed to enhance the cognitive abilities and upgrade the intellectual skills of children. By making arithmetic calculations more accessible, it helps eliminate the fear of mathematics. Abacus education not only improves mathematical proficiency but also bolsters overall academic performance, problem-solving capabilities, and self-assurance. Abacus training cultivates analytical thinking and aids in reading, writing, logical reasoning, and more.

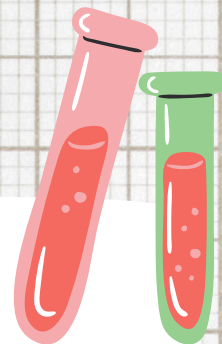

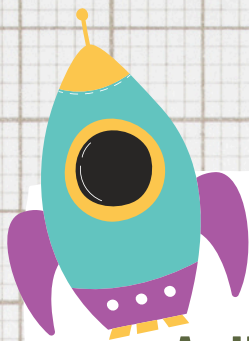

The abacus, a traditional counting tool, assists children in mastering swift and precise mental arithmetic. It significantly enhances brain functions such as concentration, visualization, listening skills, self-confidence, speed, and accuracy by engaging the right hemisphere of the brain.

The abacus can be employed for various arithmetic operations, including addition, subtraction, multiplication, and division. This method helps students conquer their fear of mathematics, leading to academic excellence across all subjects.

Abacus education improves a multitude of skills including Visualization (photographic memory), Concentration, Listening Skills, Memory, Speed, Accuracy, Creativity, Self-Confidence, and Self-Reliance, culminating in Whole Brain Development. By integrating abacus learning, children can develop a robust foundation in mathematics and foster an enduring love for learning.

Ms Syeda Tehniyath
Math Genius teacher

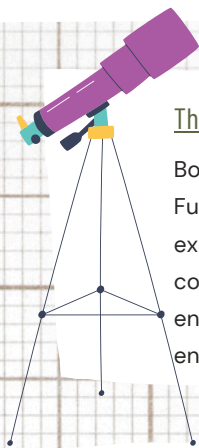

Fun Science Program: An Unforgettable Educational Journey

Following the interruption caused by the COVID-19 pandemic in 2020, the Fun Science Program has become more important than ever before. Traditional education processes have been significantly affected, making motivation and igniting passion essential to reinvigorate students' morale and compensate for the period during which they lost direct interaction with science. At Fun Science, our primary goal is to ignite the passion, interaction, and scientific imagination of elementary school students. From this principle, the Fun Science Program emerges as an effective tool to motivate and instill passion for all branches of science and uplift their morale. The program, the only of its kind and exclusive to the Sultanate, is offered in all branches of Almutahida Schools, providing our dear students with this unique and exclusive experience from kindergarten to third grade. This year, we have also begun conducting numerous educational workshops, special presentations, and external hosting in collaboration with the Activities and Trips Department. We have also built new relationships with other schools, formed friendships, and partnerships with other entities, and have participated in Christmas celebrations and special presentations in some private schools and nurseries in the capital, Muscat.

Motivating Students towards Learning

The interactive approach we adopt significantly motivates students. Instead of relying on rote memorization, the program allows students the opportunity for active participation and learning through practice and experimentation, which helps solidify information in their minds in a better and more vibrant way.

The Role of the Program in Boosting Morale and Motivating Students

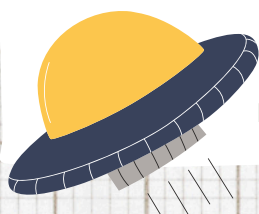

Boosting students' morale is one of the main objectives of the Fun Science Program. Through group activities and hands-on experiments, students experience the joy of achievement and collaboration. The program works to create a positive learning environment that encourages curiosity and exploration, thereby enhancing students' confidence in themselves and their abilities.

Interaction and Affection

Students exhibit a high level of interaction and affection for the scientific material. This is evident in their enthusiasm for participating in activities, their desire to explore more, and their freedom to ask questions with passion.

In Conclusion

It can be said that the Fun Science Program represents a qualitative leap in the way science is taught to students by boosting morale, motivating them, and igniting their passion for science. The program contributes to the creation of a new generation of young scientists capable of understanding many of nature's laws and the future with a creative and enthusiastic spirit.

CREATIVE SPACES

LO-I can write a short story.

The rabbit and the Sooperman

Long long ago there was a rabbit stuck in a hole.

Then, an old grandpa, came to help the rabbit, but he could not help him and a Sooperman came to the rescue.

After that, the rabbit escaped and he stole money from the bank. The cops captured him. Next, the Sooperman flew away.

Finally, the rabbit was sorry and the cops let him go.

MOHAMMED SULAIMAN AL WAHAIBI
GRADE 1A

CREATIVE SPACES

Once upon a time there was a little mermaid. She loves her under water home.

The little mermaid saw a big ship crash. Then she swam to the ship and saw a lot of food. She ate the food because she was hungry. After that, she met her fish friends and they played.

Finally, it got late and the fish friends saw a way. The little mermaid went home.
